

PRIME AVIATION POLICY ON ENVIRONMENTAL PROTECTION

Prime Aviation accepts corporate and social responsibility for protecting and conserving environmental resources as an integral part of our business strategy and connected to our well-established safety and health protection policy. Likewise, our staff members are obligated to help protect the environment in the best interests of present and future generations. The Company is committed to looking at ways to conserve energy and minimise waste in all activities that we undertake, and we respect regulations pertaining to aircraft noise, aircraft engine emissions, and comply with the requirements of the Carbon Offsetting and Reduction Scheme for International Aviation (CORSA).

All employees are responsible for implementing policies and programs of action to protect the environment regardless of where they work at the Company or on the Customer's territory.

Our objectives are to:

- Minimise and manage waste by evaluating our wide-ranging aviation activities and the scope of aircraft used to ensure that they are as efficient as possible.
- Meet and exceed legal requirements and environmental legislation related to the Company's operation and adopt higher environmental standards.
- Implement appropriate operating practices and training programs for our staff members to raise environmental awareness and issues amongst staff at all levels and to emphasise the responsibility of individuals for environmental performance.
- Encourage our suppliers' adoption of similar principles and consider suppliers' environmental policies, credentials, and performance as part of our evaluation and selection process.
- Aim to monitor, support, maintain & improve on the Company's environmental savings & performance, and maintain safe environmental practices, within our limitations.

Greg Turner, CEO
